(54) MULTIPLE ADDRESS TRANSMITTING SYSTEM IN MESSAGE STORAGE DEVICE

(57)Abstract:

PURPOSE: To facilitate the designation of the addition and the deletion of a desired address in a multiple address list so that the designation of the address of a message is quickened.

CONSTITUTION: A transmitting person inputs plural desired addresses from a message input/output terminal 1. An input address judging part 21 in a message storage device 20 judges an individual address number to be deleted (added) from (to) a multiple address number and the individual address of the multiple address number after development. A multiple

address list developing part 22 develops the multiple address list on the basis of information judged by the input address judging part 21, and a message address storing and transmitting part 23 stores the address to which the message is to be transmitted and the stored message by allowing them to correspond to each other. On the basis of the address stored by the message address storing and transmitting part 23, the message stored by a message storage part 24 is multiple-address-

transmitted to plural message input/output terminals.
